"MY" Position Programming

NOTE: the following procedure will only work after programming has been completed.
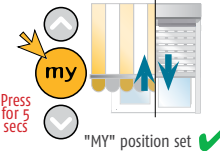

1 **Setting an intermediate position**

Use the Up or Down button to move the product towards the desired intermediate position.

Stop the product at the desired intermediate position.

Press and hold the Stop button until the product Shunts.
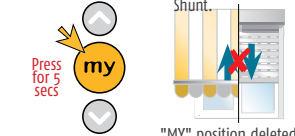

Press for 5 secs

"MY" position set ✔

2 **Deleting an Intermediate position**

Send the product to the intermediate position by pressing the Stop button

Press for 1 secs

When the product has reached the intermediate position and stopped, press and hold the Stop button until there is a Shunt.

Press for 5 secs

"MY" position deleted ✔

3 **Using the Intermediate position**

The product must be stationary, but can be at any position. Press briefly the Stop button to initiate the intermediate or 'my' position. The product will automatically move to the IP or 'my' position and stop.

Press for 1 secs

SOMFY TIP ! If an intermediate position has been set and the awning is controlled by a Somfy RTS sun sensor, then the awning will only extend to the IP position. Remove the IP function if the end user wants the awning to fully extend.

IP = ✔   IP = ✖
