Seceuroglide Key Features The choice is yours

SeceuroGlide
Garage Doors

Delve Deeper

Combining great design and exceptional build quality, the SeceuroGlide range of garage doors are designed and manufactured in the UK and offer attractive effortless protection for your home.

9 Made to measure

Made To Measure- a perfect fit means great insulation, security and better protection from weather.

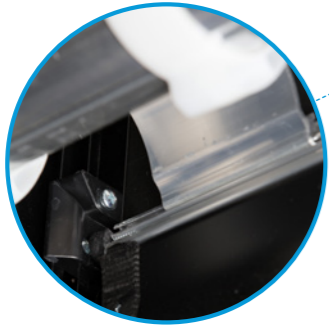

7 SeceuroDrive

SeceuroDrive range of powerful motors make a reliable choice for the SeceuroGlide roller garage doors - even better with a 7 year warranty.

10 Manual Override

Security and peace of mind at its centre by offering a manual release for the garage door.

1 Patented Locking System

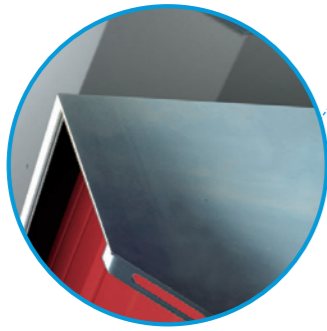

A unique patented locking system secures the door shut every time and means the door cannot be lifted open.

This applies to Classic and Excel doors.

6 Don't be left in the dark

Making your garage a safer place when parking at night SeceuroGlide utilises the tried and tested SeceuroSense control unit, which combines a courtesy light with both remote and push control functions.

2 SeceuroGlide Choice

SeceuroGlide can be ordered with either a half, full or no box. SeceuroGlide Compact comes with either a half or full box.

3 Weather Protection

SeceuroGlide is engineered to block cold draughts and keep your garage warm and usable with guide rails that are lined with a dense brush strip and a shaped rubber seal on the bottom slat.

4 Secure by Design

SeceuroGlide Excel (upgrade option) has been awarded the prestigious Secured by Design Police Preferred Specification status recognised by many insurance companies.

5 Remote Controls

Choose any 2 remotes from our wide choice of remote controls, with every door purchased. Open your door without leaving the car.

8 Safety First

The Safety Edge is fitted to the bottom of the door and is activated when the door starts to close. If it comes into contact with an object while the door is closing, it transmits a signal to the wall mounted control unit, the door will then stop and reopen a short distance. Ensuring carefree operation and safety.

Looking for something special?

With over 40 other wood effect finishes to choose from, the SeceuroGlide range of roller garage doors has a finish to match any home. **Please note:** powder coating is not available on LT products. Visit sws.co.uk to see the full range of finishes available.

*Not available on SeceuroGlide Compact - Woodgrains and Painted Woodgrains are not available on the SeceuroGlide Manual.

The choice is yours

When purchasing an automatic SeceuroGlide Roller Garage Door you choose the two remotes you would like from our wide selection. Our Bi-Directional remotes allow you to check on the status of your garage door. At the touch of a button from the comfort of your home you will be able to determine if your door is open or closed.
