important to you

SeceuroDoor
Stack Grille

Why Choose the SeceuroDoor Stack Grille?

The innovative and patented technology of the SeceuroDoor Stack Grille results in a lightweight and strong safety door that isn't liftable by would-be intruders, whilst offering easy installation, contemporary design, and a large reduction in the installation space compared to standard door designs.

The SeceuroDoor Stack Grille sets the standard for security grilles with solid steel vertical pins secured into heavy gauge steel horizontal bars. These bars create a self-locking curtain which prevents lifting, providing an increased level of security.

Our Most **Versatile** Shutter

The SeceuroDoor Stack Grille shutter can be made in any shape: straight, curved or angled.

These unique features make it the most versatile shutter offered by SWS UK, fitting virtually any shape of opening.

Key Features

- ✓ Constructed of 30 x 15mm horizontal beams with 8mm thick vertical connectors
- ✓ 80% visibility
- ✓ Made to measure for a tailor made security solution
- ✓ RC2 / RC3 burglar-resistant

- ✓ Up to 12m clear opening width guarantees interior or exterior views are unobstructed by central guide rails
- ✓ Low installation space
- ✓ High usage and rapid operation options are available.
- ✓ Range of compatible controls and safety systems are available

Explore the SeceuroDoor Stack Grille Product Range

Standard

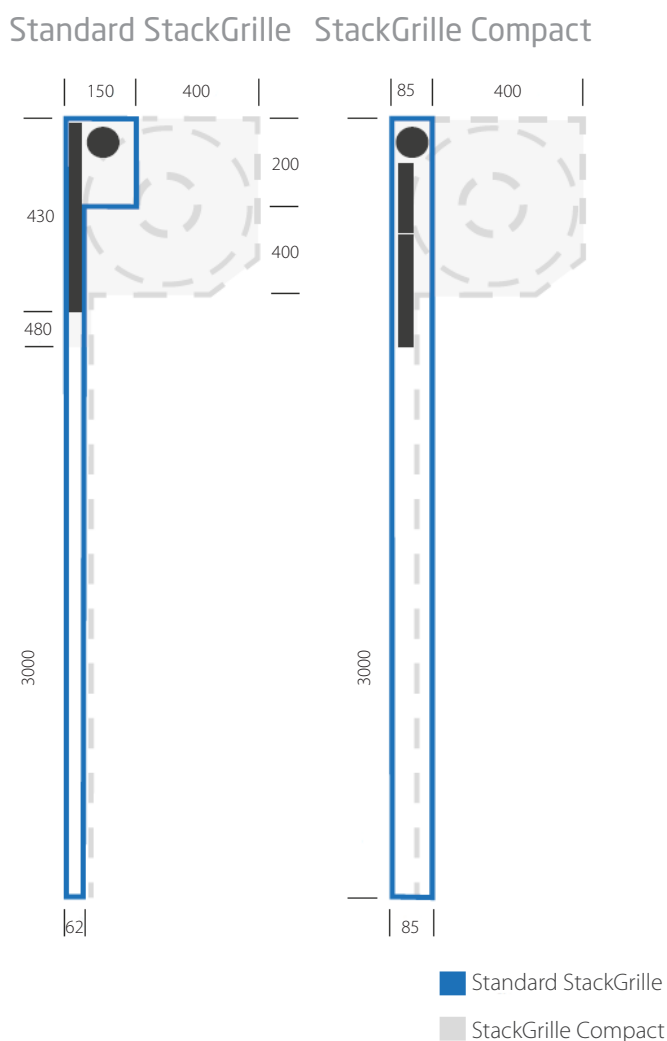

The innovative design of the standard SeceuroDoor Stack Grille range allows for 80% free airflow without detracting from beautiful design. Retail outlets, car park entrances and low-to-medium risk commercial buildings will benefit most from this option; especially as the patented stacking feature eliminates the need for a headbox.

Car Park

With the self-locking system after every cycle, capability to cover wide openings, and a high duty cycle motor specifically for regular use, the SeceuroDoor Stack Grille is ideal for car park entrances. Furthermore, the operation is compatible with access control and building management systems.

Compact

For openings with limited space SeceuroDoor Stack Grille Compact has the unique ability to store the barrel at the top of the guides, reducing the required depth from 150mm to 85mm.

Applications

Designed for the commercial market, there are a range of businesses and sectors that would benefit from a SeceuroDoor Stack Grille as their security solution.

This latest technology in security grilles is particularly ideal for:

- ✓ Shopping Centres
- ✓ Kiosks
- ✓ Service / information desks
- ✓ Trade halls
- ✓ Airports
- ✓ Hospitals
- ✓ Segregation for public access in train stations, tube stations and public footpaths
- ✓ Separation between private parking bays
- ✓ Interior construction and warehouses where ventilation and security are needed

Key Features of the SeceuroDoor Stack Grille

Limitless Design Possibilities

Due to the ingenious nature of this product, you can choose precisely what you need – from any colour to almost any shape of opening. For the first time, it is possible to achieve the highest safety standards with curved doors, corner solutions and large spans without the need for extra side guides.

The unique nature of The SeceuroDoor Stack Grille enables a Double-Stack option for applications with limited headroom. When lowered, the SeceuroDoor Stack Grille will present as a standard product, but when raised utilises twin guide rails, taking up a much smaller space and providing a larger opening.

Created with You in Mind

Designed for the commercial market, there are a range of businesses and sectors that would benefit from a SeceuroDoor Stack Grille as their security solution.

Setting the Standard

The SeceuroDoor Stack Grille sets the standard for security grilles with solid steel vertical pins secured into heavy gauge steel horizontal bars. These bars create a self-locking curtain which prevents lifting, providing an increased level of security.

Peace of Mind

With reliability at the forefront of end-users' minds, high usage and rapid operation options are available.

Additionally, a range of compatible controls and safety systems are available, ensuring the solution selected fully meets the requirements of the end user.

Inconspicuous

Up to 12m clear opening guarantees interior or exterior views are unobstructed by central guide rails, with powder coating to any RAL and as well as a stainless steel option, ensures the SeceuroDoor Stack Grille remains concealed within its surrounding environment.

Peace-of-Mind Warranties

All SeceuroDoor products are guaranteed against defect of material or workmanship by SWS UK, subject to correct installation, maintenance and operation, for a period of 2 years from the date of purchase. All motors carry a 1 year guarantee.
